Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1 - 15. (cancelled)

16. (original) A method for estimating an exotherm across a NOx-reducing catalyst coupled downstream of an internal combustion engine, comprising: providing an indication that a catalyst temperature is above light-off; in response to said indication, increasing reductant injection into the catalyst by a predetermined amount; and

calculating an expected exotherm based on said predetermined increased reductant injection amount and on an amount of reductant stored in the catalyst.

- 17. (original) The method as set forth in Claim 16 wherein the NOx-reducing catalyst is an ALNC.
- (original) The method as set forth in Claim 16 wherein the NOx-reducing catalyst is an oxidation catalyst.
- (original) The method as set forth in Claim 16 wherein said reductant is hydrocarbon.
- 20. (original) The method as set forth in Claim 16 further comprising calculating an actual exotherm based on at least a temperature measurement downstream of said catalyst.
- 21. (original) The method as set forth in Claim 20 further comprising providing an indication of catalyst degradation based on a comparison of said actual and said expected change in said exotherm.

22-23. (cancelled)
